

problem 7

Write C program to delete an element in an array: This program delete or removes an element from an array. User will enter the position at which array element is to be deleted. Deleting an element does not affect the size of the array. It is also checked whether deletion is possible or not, for example, if array contains five elements and user wants to delete element at sixth position, it is not possible.

expected output:

```
E:\programmingsimplified.com\c\delete-array.exe
Enter number of elements in array
5
Enter 5 elements
4
6
8
10
7
Enter the location where you wish to delete element
2
Resultant array is
4
8
10
7
```
