

If you have 2 arrays the size of first array 20 and have 10 elements of odd number the second 10 and have 10 even number. Write C Program to enter an element of second array inside the first array and print it.
For example:

```
char array1[20]={1,3,5,7,9,11,13,15,17,19} ; Char  
array2[10]={2,4,6,8,10,12,14,16,18,20};
```

```
Output: 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15  
16 17 18 19 20
```

expected output:

```
C:\Windows\System32\cmd.exe
Microsoft Windows [Version 6.3.9600]
